

One on One

Our One-on-One consultancy responds to your individual needs as a client. It allows us to draw upon your ideas and evolve them.

From the script through to the final edit, our One-on-One service allows us to introduce ourselves. It also allows for you to better understand the process of production, giving you the opportunity to offer your input on the project every step of the way and to see that your budget is devoted towards that which is most important to you.

Our One-on-One meetings will not only enable you to understand each production process better, but also give you the opportunity to discuss, review and rethink the project as it evolves and its significant points become more clear.

We believe that it is vital that trust is built between us and that you feel comfortable to discuss any questions you may have, so that we can provide the best service and achieve the best quality of product suited to your needs.

All of our meetings are held with great clarity and in the upmost confidentiality.

Main factors that are addressed through the one on one approach are Problem Solving, Coaching, Counselling, Project Development, Planning and Objective Achievement.

Benefits of these meetings include the opportunity to tailor your project close to the seams as well as for or us to content to your needs and provide a fluid process through discussion over a developed trust and commitment to achieve results.
